

A look at past winners.

**“The Culture for Success Award was the culmination of a fantastic year. The Award let our staff know we appreciated their efforts and was an independent voice saying ‘Good work – a great culture has made a difference!’”**

### **CCS Mobile**

CCS are a business to business telecommunications company who provide total communication solutions to the likes of Nike, Umbro, Manitowoc, PUMA, Thompsons Building Centres and many others. CCS help their clients get the best deals in the market while ensuring that they have world class communication infrastructures, internally and on the move. CCS do things differently and were recognised by Service Network for having a culture for success. The firm provides an end-to-end proactive account management process, which was put in place to reassure clients that they do not incur any unexpected bills when users of the company go overseas or mix business with leisure.

Winning last year's Award was deserved recognition for CCS. Their culture is both empowering and energising and the staff are rewarded for solving clients' problems. This Award has helped internally where the staff are rightly proud of what has been achieved but are always trying to improve. Externally, prospective clients value having independent confirmation that the firm delivers to their existing clients and CCS have seen major client wins where being endorsed by Service Network has made a difference.

**Chris Lee, Managing Director**
